Discussing all possible workarounds to solve a problem is what I enjoy the most. I believe a great part of who we are is whom we hang with, that's why I'm always looking forward to working with knowledgeable people, to grow as both a professional and a human being.

Skills

Advanced	Git, Python, Linux, Docker
Intermediate:	Node.js, AWS, Grafana, Express, Flask, Serverless, REST API
Learning / Basic	Kubernetes, Go, Vue.js, LaTeX

Work Experience

Edrans — *Argentina - USA*
Site Reliability Engineer — *Jun. 2018 - Present*
- Co-developed a full Serverless app with 3 fully composable Microservices/APIs using Python and NodeJS in AWS
- Solved several IaC issues with both Serverless, and CloudFormation in AWS and automate a handful of procedures using Docker and Docker-compose

Codelamp — *Argentina*
Freelance Developer — *Sep. 2013, Present*
- Dealt with most aspects of development, from writing a functional brief to designing, coding, selling and maintaining the software.

Go Soluciones y Sistemas — *Argentina - Uruguay*
Full Stack Developer — *May. 2018 - Jun. 2018*
- Developed several modules of a system that tracks trucks and sends a report over GPS signal in order to calculate trips' costs depending on different variables and had to interact with the SAP API in order generate ready-to-print invoices from within the system I was developing.

Toyota S.A — *Argentina*
System Security Intern — *Dec. 2016 - Dec. 2017*
- Administrated Active Directory, MySQL and Windows Servers as well as Massive software installation procedures with InvGate software

Education

UNSAM (Universidad Nacional de San Martín) — *Buenos Aires, Argentina*

UBA (Universidad de Buenos Aires) — *Buenos Aires, Argentina*
Computer Engineering (Abandoned studies) — *Mar. 2014 - Jun 2017*

Languages

English	Advanced | FCE (First Certificate Exam)
Spanish	Native

Projects

Personal \| Full Stack — *Buenos Aires, Argentina*
CANUSLECTOR.SITE — *Sep. 2018 - Aug. 2018*
- Personal site where I post most of my readings, for this project I used Vuejs, Node, Mysql for development and AWS EC2/S3 as Infra.

Edrans \| Full Stack Dev. + Microservices — *Las Vegas, USA*
Blog post of this project: LUCASCONTRE.SITE — *Jan. 2019 - May. 2019*
- Co-developed in the development of an application that interconnects and interacts with several Microservices using Python, Flask, Serverless, Node and Vuejs

Codelamp \| Full Stack Dev. — *Buenos Aires, Argentina*
AntiplagaNorte Management system — *Jan. 2019 - May. 2019*
- Co-developed an application that merges all of the activities performed in AntiplagaNorte into a single app, generating useful data and dealing with a complicated domain logic. For this project we used PHP, Laravel and MySQL and interacted with the OpenWeather APIs
